

Pueblo Radiology Medical Group

## Dialysis Graft Patient Information

### **Pre-procedure**

- Nothing to eat 2 hours before the examination.
- Patients may be given sedation prior to or during the procedure. The patient will need a driver to and from the office on the day of exam due to the sedation.

### **Post-procedure**

- Patient will be monitored at Pueblo Radiology until our radiologist discharges them.
- Resume visits with Dialysis Center immediately.
- Sutures should be removed in two days; the patient may come to the Pueblo Radiology office for this if needed.

Any questions before or after the examination please call:

Ventura - 654-8170

Santa Barbara – 682-7744
